2024 is a Leap Year!

We have an extra day this year, February 29th! Why is a Leap Year necessary? We need to add an extra day every four years so our calendar stays aligned correctly with astronomical seasons, since the Earth's orbit around the sun is approximately 365.25 days.

February 29th is known as Leap Day and person born that day is known as Leaplings! Many people feel being born a Leapling is a sign of good luck!

Leap Years were established all the way back in 45 BC when Roman Emperor Julius Caesar instituted the Julian Calendar. Adjustments to the process have been made since then!

Long ago Leap Day was known as "Ladies Day" or "Ladies' Privilege" and was the one day women were allowed to propose to men. However, there are some cultures where people believe getting married during a Leap Year is bad luck!

According to folklore, the weather always changes on Friday in a Leap Year.

Ingredients

1 pound dark or semisweet chocolate (or a combination), finely chopped
1-2/3 cups heavy cream
1 teaspoon pure vanilla extract
1/2 teaspoon kosher or sea salt
1 cup (approx.) unsweetened cocoa powder

*Every four years with a bound
With a leap up from the ground,
Trying to grow tall as they—
All you stretch is one small day!
Even then you're not so tall
But just the shortest month of all.*

bowl. In a small saucepan, over medium-high heat, bring cream to a simmer; pour hot cream over chocolate. Cover bowl with plastic wrap and let stand 10 minutes. Uncover and whisk chocolate mixture until smooth. Whisk in vanilla and salt. Pour into a pie plate and let cool 10-15 minutes. Cover with plastic wrap and refrigerate until completely set, about 3 hours.

Place cocoa powder into a second pie plate. Using a melon baller or 1-inch ice-cream scoop, scoop out some chocolate mixture and roll into a ball. Roll in cocoa powder to cover; then place on a parchment-lined baking sheet. Repeat with remaining chocolate. Gently pinch the tops for interest. Refrigerate until set, about 15 minutes.
